

Background

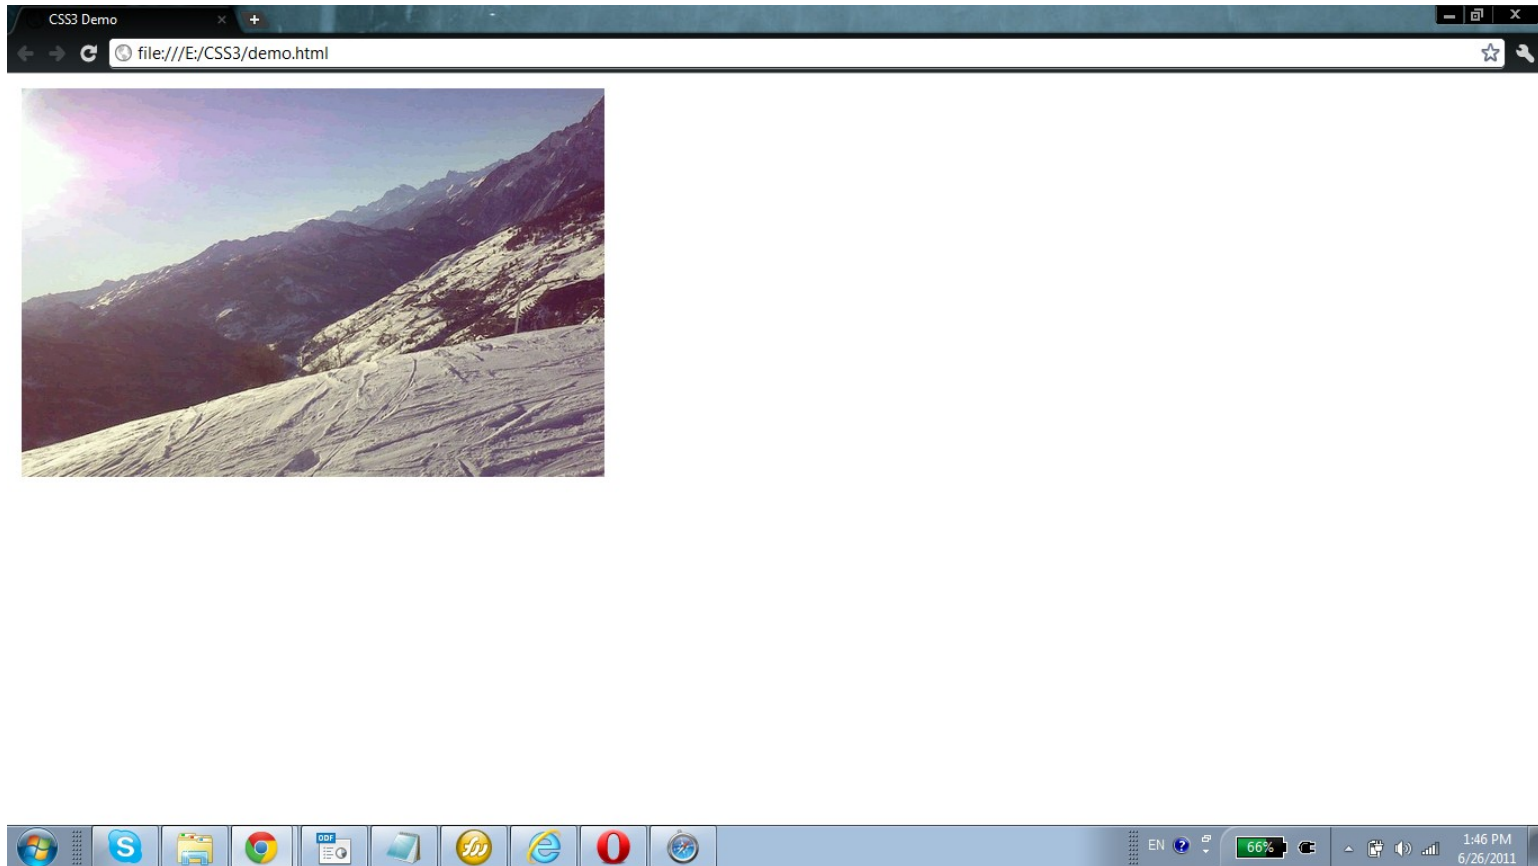

The background-size Property

- ❖ We can use this new property in order to specify the exact size of the background image.
- ❖ If we specify the size in pixels then the image will be resized to the specified number of pixels.
- ❖ If we specify the size in percentage then the size will be relative to the size of the parent element.

The background-size Property

```
<html>
  <head>
    <title>CSS3 Demo</title>
    <style type="text/css">
      div#something
      {
        background:url(snowboard.gif); —— image dimension is 698x408
        background-size:300px 200px;
        width:300px;
        height:200px;
      }
    </style>
  </head>
  <body>
    <div id="something"></div>
  </body>
</html>
```
