### **PHP Open Source Projects**

### abelski

### Introduction

# What is Open Source Software?

"Open source is a development method for software that harnesses the power of distributed peer review and transparency of process. The promise of open source is better quality, higher reliability, more flexibility, lower cost, and an end to predatory vendor lock-in."

(Open Source Initiative)

The Open Source Definition

# The Open Source Initiative

"The Open Source Initiative (OSI) is a non-profit corporation formed to educate about and advocate for the benefits of open source and to build bridges among different constituencies in the open-source community."

(Open Source Initiative)

# **Open Source Licenses**

The open source license exists in different versions. The different licenses differ from each other in their permits.

**Open Source Licenses**
