# UML Communication Diagrams

Introduction

- The communication diagram focuses on the objects relationships showing a birds eye view of the objects and their collaboration.

- The communication diagram presents objects with association connectors between them.

- The messages sent from one object to another are depicted as short arrows.

- The sequence of the messages is depicted through a numbering scheme.

Introduction

Message Notation

- Each message that goes from one object to another should be written to the following pattern:

  [sequenceNumber:] methodName(parameters) [: returnValueType]

  The sequenceNumber and the returnValueType are optional.
